

Preventive Measures for your 10-day Isolation

Now that you have tested Positive for COVID-19, you should follow the preventive steps below until your isolation period has been completed and you have been confirmed to return to normal campus activities.

Stay home except to get medical care

You should restrict activities outside of your home, except for getting medical care. Do not go to work, school, or public areas, and do not use public transportation or taxis.

Separate yourself from other people in your home

As much as possible, you should stay in a different room from other people in your home. Also, you should use a separate bathroom, if available.

Call ahead before visiting your doctor

Before your medical appointment, call the healthcare provider and tell them that you are in isolation after testing Positive for Coronavirus Disease (COVID-19). This will help the healthcare provider's office take steps to keep other people from getting potential exposure.

Wear a facemask

You should wear a facemask when you are in the same room with other people and when you visit a healthcare provider. If you cannot wear a facemask, the people who live with you should wear one while they are in the same room with you.

Cover your coughs and sneezes

Cover your mouth and nose with a tissue when you cough or sneeze, or you can cough or sneeze into your sleeve. Throw used tissues in a lined trash can, and immediately wash your hands with soap and water for at least 20 seconds.

Wash your hands

Wash your hands often and thoroughly with soap and water for at least 20 seconds. You can use a 60% alcohol-based hand sanitizer if soap and water are not available and if your hands are not visibly dirty. Avoid touching your eyes, nose, and mouth with unwashed hands.

Avoid sharing household items

You should not share dishes, drinking glasses, cups, eating utensils, towels, bedding, or other items with other people in your home. After using these items, you should wash them thoroughly with soap and water.

Monitor your symptoms

Monitor and document your symptoms for 10 days using the Self-Monitoring Form provided. If your symptoms worsen, contact your healthcare provider. **Before** going to your medical appointment, call the healthcare provider and tell them that you are isolating due to testing Positive for Coronavirus Disease (COVID-19). This will help the healthcare provider's office take steps to keep other people from getting infected.

10-day incubation period observations

Take your temperature twice a day, in the morning and in the evening, and write it down. Mark if you have any of the symptoms: circle 'Y' for Yes and 'N' for No. Don't leave any spaces blank.

DATE	TIME	Temperature	Cough	Fatigue or aches	Shortness of Breath	Diarrhea	Chills
1	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N
2	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N
3	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N
4	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N
5	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N
6	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N
7	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N
8	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N
9	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N
10	AM		Y N	Y N	Y N	Y N	Y N
	PM		Y N	Y N	Y N	Y N	Y N

* The attached forms are provided by the Centers for Disease Control and Prevention for patients who are under public health monitoring. They are being provided to you out of an abundance of caution to use to protect yourself while at home.
